Develop & Write

Import, create or edit Edge2Learn or your policies using most file types, including Microsoft Word, Excel, PowerPoint, PDF, JPEG, HTML and Videos.

Collaborate & Approve

Using workflows, track changes, review comments from peers, accept, delete, edit and approve policies in one defined process and system. Allow for tracking of versioning of published and archived policies.

Distribute & Search

Distribute and assign policies to predefined users or groups created within Edge2Learn or by you. Deep link redirects users to policies from other applications and intuitive keyword search allows users to browse and find policies and procedures.

Reporting & Accountability

Reporting detailing which policies have been assigned and signed by user and which users are overdue or have not signed a policy. Overall reporting on most viewed policies, least viewed policies, policies in draft, versioning and which workflows are outstanding.
